

Category 1: Monthly Safety Consulting

Ongoing professional safety guidance without the expense of a full-time hire.

Safety Advisor - \$600/month

\$600/mo

Up to 2 hours of remote support per month, quarterly review of client-submitted safety documents, routine program updates as regulations change, and toolbox talk development.

Safety Partner - \$1,500/month

\$1,500/mo

Up to 5 hours of remote support per month, monthly document review, monthly consultation call with action summary and safety calendar, program updates as regulations change, and toolbox talk development.

Monthly plans cover ongoing guidance and defined support services. New program development, substantial revisions, and custom training development are separately scoped and quoted. Initial program development is not required for monthly clients.

Category 2: Safety Program & Training Development

Initial Safety Program Development

From \$1,750

A customized package of foundational written safety programs and procedures, tailored to your industry, operations, hazards, and regulatory requirements. Final pricing set through consultation and agreed scope.

Individual Safety Programs & Procedures

From \$500 each

Development or customization of individual written safety programs and procedures for your operations and applicable regulations.

Safety Training Development

From \$500/kit

Customized training materials for your workforce. Standard kits include a 20-30 minute slide presentation, facilitator notes, and an attendance form.

Complex or Extended Instructor-Led Courses

Custom quote

Custom courses for more complex topics or longer instructor-led sessions.

Hourly Safety Consulting

\$250/hour

Flexible, as-needed safety consulting for businesses that don't require ongoing monthly support. Ideal for one-off questions, document reviews, or short-term projects - billed only for the time you use.

Category 3: Specialized Safety Services

- Incident investigations and analysis
- OSHA and Cal/OSHA citation assistance
- On-site safety assessments and inspections
- Job safety analysis and hazard assessments
- Regulatory compliance consulting
- Safety management system evaluations
- Other specialized safety consulting services

Pricing for specialized services is determined following an initial consultation.
